Conclusions

Faith development happens in the context of home, church, school, and culture; each plays its role. What role?

Room for Improvement:

1. Home: Personal and family devotional life
2. Local churches: young people's satisfaction, safe and friendly climate, young leaders' training especially in Inter and South Americas and secular context, young people's involved in decision making process especially in Inter and South Americas and secular context
3. Local churches: in all contexts intentional involvement of 21-35 age group (Millennials) in ministry with their spiritual gifts on Sabbath and during the week
4. Intentional discipleship of high school and college students in all aspects of their spiritual life, involvement, and service
5. Adventist education: is not available everywhere; not only its presence is important but the content addressing cultural beliefs in local context and doctrinal issues young people are struggling with
6. Special attention to such doctrines as the state of the dead, salvation by grace, sinful nature, pre-advent judgment
7. Application of religious principles by young people to their daily life especially in cultural contexts in Asia, Inter and South America, and Africa
